“

There is an inherent caution and people desperately want to reduce the risk of a second wave, but life is slowly starting to return to normal – restaurants are opening and the economy is starting to get moving once again. We are certainly through the worst, but not back to normal in the coming months.

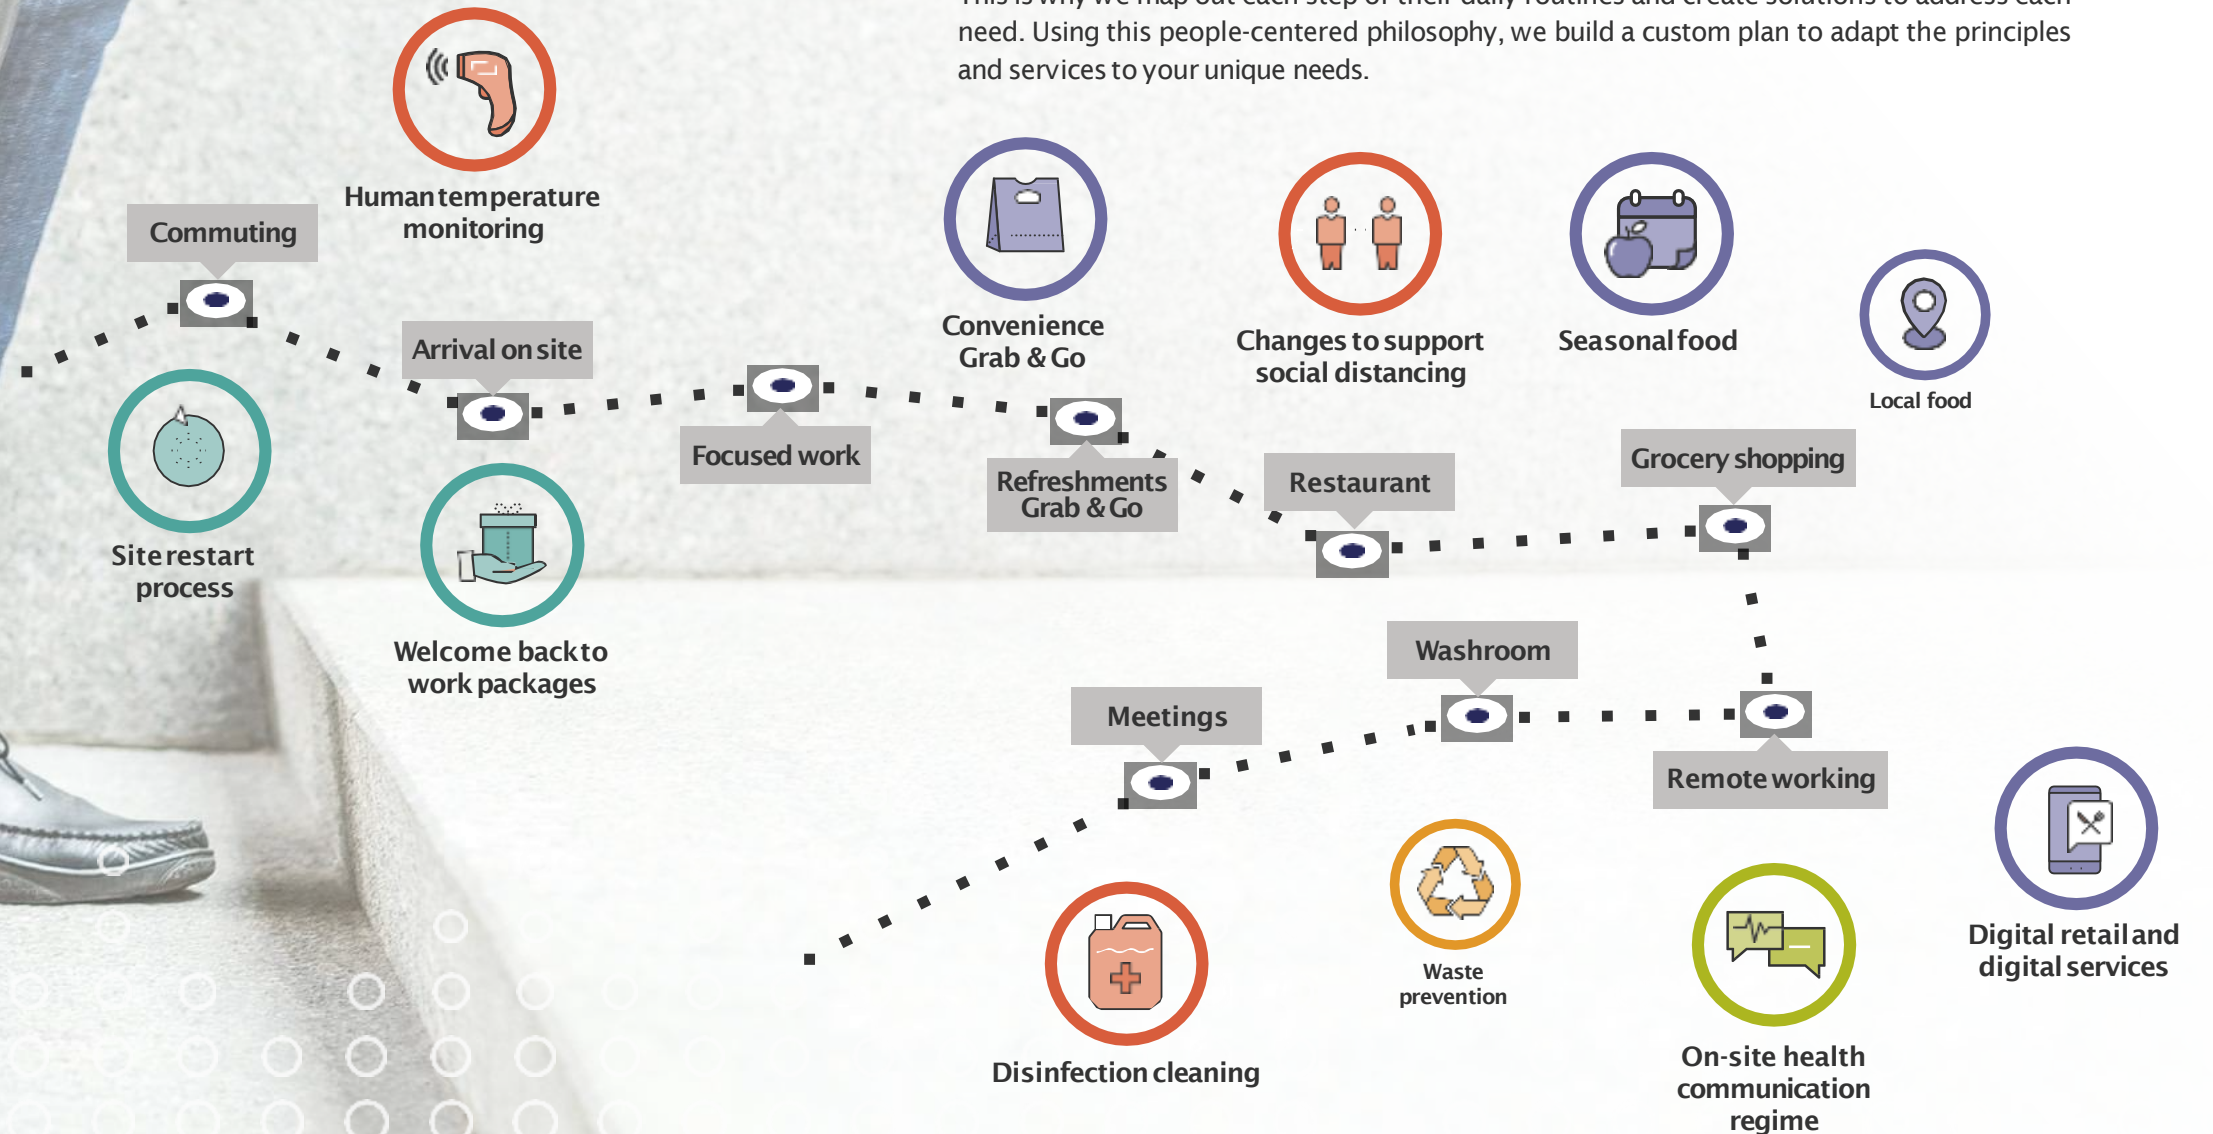

We are at a stage now where people really want to move on and get back to normal. We are focused on engaging with clients and assessing how their people are feeling. There is increased anxiety and we are taking lots of measures to make people feel secure and safe.”
